

Keeper Goals Provides Athletic Facility Equipment For UW-Green Bay Softball Complex

Milwaukee, WI – August 2, 2020

The University of Wisconsin Green Bay recently chose Keeper Goals to supply athletic facility equipment their newly renovated softball stadium. The stadium is located on campus at UW-Green Bay and is home to the UW-Green Bay NCAA Division I Softball Team.

The backstop netting is a 30' high in-line system. The in-line design helps provide a better fan experience by minimizing sightline blockages.

The cages are double 55' steel modular Tuff Pro batting cages with a large post design.

The dugouts are 40' long with and are covered with custom printed windscreen showing the school logo on the backs and acknowledgement of the donors on the sides. The dugouts are equipped with custom rail pads.

Keeper Goals also supplied wall pads on the outfield fence and 30' foul posts.

“We were happy to work with the University of Wisconsin – Green Bay Athletics on their softball stadium renovation. We are proud to supply them with equipment for this beautiful facility,” said John Moynihan, president and CEO of Keeper Goals.
